

SANJAY KRISHNAN S

AI Engineer | Machine Learning | Computer Vision | Data Science
sanjaykrishnan437@gmail.com | +91 8072286139 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

A versatile problem-solver with hands-on experience building and delivering solutions. Combines analytical thinking, adaptability, and practical execution, with experience working across different stages of product development and collaborating on technology-driven projects.

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java, TypeScript, JavaScript
- **AI/ML:** PyTorch, YOLO, OpenCV, TensorFlow, Keras, Scikit-learn, Pandas, NumPy
- **Development:** FastAPI, Node.js, Express.js, React, Next.js, Tailwind CSS
- **Cloud/Backend:** AWS, Google Cloud, Supabase, Firebase, MySQL, PostgreSQL, SQLite
- **IoT/Edge:** NVIDIA Jetson, Raspberry Pi, MQTT, Sensors
- **Tools:** Git, GitHub, Jupyter, Google Colab, Streamlit

EXPERIENCE

Sortyx Ventures Private Limited — Chennai

AI Engineer | Jun 2026 – Sep 2026

- Built a waste-classification computer vision model with Python, PyTorch, YOLO and OpenCV covering 4 waste categories (Plastic, Metal, Paper, General), achieving 87–92% classification accuracy across categories and testing conditions.
- Developed and integrated web applications, backend services and cloud infrastructure using modern development tools and AWS.
- Integrated AI systems with IoT and edge devices, supporting real-time data collection, processing and intelligent monitoring.

AI Engineer Intern | Mar 2026 – Jun 2026

- Developed AI automation workflows and SaaS solutions for practical business and startup use cases.
- Prototyped edge-AI inference on NVIDIA Jetson Nano, integrating hardware and software to run computer-vision models directly on-device.
- Created and managed AI/ML datasets, including image/data collection, preprocessing and preparation for model development.
- Performed data analytics and supported model development, testing and validation across AI projects.

IBM SkillsBuild — Virtual

AICTE — AI & ML Intern | Jun 2025 – Jul 2025

- Built an ML-based sales prediction model in Python with Scikit-learn, applying EDA, feature engineering and model evaluation to forecast sales.
- Applied hyperparameter tuning and cross-validation to improve model performance.

PROJECTS

Intelligence & Monitoring Platform | [Link](#)

- Developed an AI + IoT intelligence platform covering waste classification, fill-level and weight monitoring, telemetry, analytics, alerts and operational intelligence.
- Integrated computer vision, IoT sensors, MQTT and edge devices with web/application components to enable real-time monitoring and AI-driven decision workflows.

Grant Applier AI Automation | [Link](#)

- Built an AI-assisted workflow covering grant discovery, eligibility analysis, application-response generation and application tracking.
- Combined Python, LLM workflows, Excel/data processing and browser automation to streamline the end-to-end grant research and application process.

Aquifer Ground Water Level Intelligence | [Link](#)

- Integrated 3 major environmental data sources — NASA, NOAA and USGS into a unified groundwater intelligence platform.
- Implemented forecasting, historical analysis, well monitoring, GIS mapping and site recommendation using Python, FastAPI, React and data analytics.

RESEARCH & ACHIEVEMENTS

- Paper Publication: “**An Explainable AI-Driven Intelligent Assessment Platform**” — IJCREM Journal, Apr 25, 2026.
- **UIDAI National Data Hackathon 2026** — National Hackathon participant.
- **Google AI Day for Startups India 2026** — Startup program and afternoon hackathon participant.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | Dhanalakshmi Srinivasan Engineering College | 2022–2026 | CGPA: 8.2/10

CERTIFICATIONS

Machine Learning Specialization — Coursera | **Machine Learning** — NPTEL | **Intro to SQL** — Kaggle | **Data Science Masterclass** — Udemy | **IBM Deep Learning** — Coursera
