

SANJAY KRISHNAN S

AI Engineer | Machine Learning | Computer Vision | Data Science
sanjaykrishnan437@gmail.com | +91 8072286139 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI Engineer with hands-on experience in AI/ML, computer vision, data analytics, AI automation, web/application development, cloud, IoT and edge AI. Experienced in building practical AI products from datasets and models through application integration and deployment.

TECHNICAL SKILLS

Programming: Python, SQL, Java, TypeScript, JavaScript

AI/ML: PyTorch, YOLO, OpenCV, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

Development: FastAPI, Node.js, Express.js, React, Next.js, Tailwind CSS

Cloud/Backend: AWS, Google Cloud, Supabase, Firebase, MySQL, PostgreSQL, SQLite

IoT/Edge: NVIDIA Jetson, Raspberry Pi, MQTT, Sensors

Tools: Git, GitHub, Jupyter, Google Colab, Streamlit

EXPERIENCE

Sortyx Ventures Private Limited — Chennai

AI Engineer | Jun 2026 – Sep 2026

- Developed AI and computer vision solutions using Python, YOLO and OpenCV for real-world applications.
- Built the AI Intelligence & Monitoring Platform, integrating application/web development, cloud services, analytics and monitoring.
- Worked on AWS, IoT and edge-device integration for AI-powered systems and real-time monitoring.
- Contributed to end-to-end AI application and product development from model integration to deployment.

AI Engineer Intern | Mar 2026 – Jun 2026

- Developed AI automation workflows and supported SaaS product development.
- Worked with NVIDIA Jetson Nano for edge-AI and prototype development.
- Built and managed AI/ML datasets, including data collection, preprocessing and preparation.
- Performed data analytics and supported AI/ML development, testing and validation.

IBM SkillsBuild — Virtual

AICTE — AI & ML Intern | Jun 2025 – Jul 2025

- Developed an ML-based sales prediction solution using Python, EDA, feature engineering and model evaluation.
- Applied hyperparameter tuning and cross-validation to improve model performance.

PROJECTS

Intelligence & Monitoring Platform | [Link](#)

- Developed an AI + IoT platform for real-time waste monitoring, classification and operational intelligence, combining computer vision, telemetry, analytics and smart-device data.
- Worked across Python, YOLO, PyTorch, OpenCV, MQTT, edge devices and web/application components to connect AI models with real-world monitoring workflows.

Grant Applier AI Automation | [Link](#)

- Built an automation workflow for grant discovery, eligibility analysis and application preparation, reducing repetitive research and form-processing tasks.
- Implemented AI-assisted processing with Python, LLM workflows, Excel/data handling and browser automation for structured grant-application workflows.

Aquifer Ground Water Level Intelligence | [Link](#)

- Developed a groundwater intelligence platform for forecasting, historical analysis, well monitoring, site recommendation and regulatory-support workflows.
- Integrated NASA, NOAA and USGS data with Python/FastAPI, React, analytics and GIS mapping to create an interactive environmental intelligence application.

RESEARCH & ACHIEVEMENTS

- Paper Publication: “**An Explainable AI-Driven Intelligent Assessment Platform**” — IJCREM Journal, Apr 25, 2026.
- **UIDAI National Data Hackathon 2026** — National Hackathon participant.
- **Google AI Day for Startups India 2026** — Startup program and afternoon hackathon participant.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | Dhanalakshmi Srinivasan Engineering College | 2022–2026 | CGPA: 8.2/10

CERTIFICATIONS

Machine Learning Specialization — Coursera | **Machine Learning** — NPTEL | **Intro to SQL** — Kaggle | **Data Science Masterclass** — Udemy | **IBM Deep Learning** — Coursera
